How is your Dimock data validation going?

Would you like to run one of the biomarkers, HF183, CF128, or CF193, all by yourself?

There is change in the plan so I will be here tomorrow and plan to run one PCR. If you have time to run one (anytime between now and end of next week), I will run the other two tomorrow.

I will start getting F202 ready for the Elisa study next week when this MST is done.
